

RITE NOW @ ROP

As the Coronavirus pandemic continues to impact all of us, we are challenged to find creative and safe ways to relieve the stress and worry facing our staff, students and families.

Even during these tough times, the Woodford Home managed to find a small slice of joy to brighten up our days by taking in a little old school arcade fun. The Woodford Home operates within a family-style, cottage group setting and its staff took the initiative to rent a “mobile arcade” trailer that houses many old school style arcade machines. The mobile arcade was brought to the parking lot of the Woodford Home and our Student Athletes got to take some time out of their busy day and take their minds off of things.

Our Student Athletes were able to take to the ring as Wolverine or Ryu and battle it out, take to streets for a little racing and even test their skills with a little Pac-Man without having to leave the property or be exposed to crowds. The unique venue allowed for staff and students to ensure that the gaming consoles were wiped down and disinfected prior to and after using them in accordance with current health and safety guidelines.

With everything that is going on in the world today, it was a breath of fresh air to see smiles on their faces once again.
